The math that matters

Pay \$299 once, save hundreds of hours. Whether you build by hand or with AI, the numbers add up.

Built by Humans Built by AI

Time you don't spend building

1,700+ hours

What this means

- ✓ 10 months of design and dev work
- ✓ \$150K to \$250K in opportunity cost

Return on investment

800x

How you benefit

- ✓ Pay \$299, skip 270+ build cycles
- ✓ Worth 300x to 800x what you pay

Based on hiring a designer and developer at market rates to build all 270+ assets from scratch.

Loved by real builders

Here's what they're saying.

Dany
@MajorBaguette

A product so well crafted that it becomes an instant classic in your stack? My last one is React Bits.

Tanmay
@syskey_dmg

A sleek, minimal, and super dev-friendly React component library. Clean UI, easy to use, and perfect for modern projects.

shadcn
@shadcn

Everything about this is next level.

Dany
@MajorBaguette

A product so well crafted that it becomes an instant classic in your stack? My last one is React Bits.

Greg Bergé
@gregberge_

React Bits: A stellar collection of React components to make your landing pages shine ✨

Rui
@Logreg_n_coffee

Literally the coolest library for React.

Justine Chang
@justine_chang39

@davidhdev is cooking some of the most beautiful components I have ever seen with React Bits.

Greg Bergé
@gregberge_

React Bits: A stellar collection of React components to make your landing pages shine ✨

Gibson
@GibsonSMurray

React Bits has got to be the most artistic component lib I have seen in a while 🍷

Adeel Imran
@adeelibr

An amazing list of curated react components - from text animation, hover effects, to really cool backgrounds.

OrcDev
@theorcdev

If you haven't seen React Bits yet, you need to. David is grinding harder than any warrior you've seen before.

Gibson
@GibsonSMurray

React Bits has got to be the most artistic component lib I have seen in a while 🍷

Simple pricing. Standout UI.

100+ components, 158+ blocks, 10 full templates. New ones every month.

Everything we build, in one plan

Every component, block, and template has a live preview. [Browse before you buy.](#)

Questions, answered straight

If something isn't covered here, reach out and we'll get back to you.

What's actually included?

+

Is it a subscription?

+

Can I use it on client work and SaaS?

+

- Do I get future updates?+
- How often do you release new things?+
- What stack does it use?+
- Does it work with AI tools like Cursor and v0?+
- What's the refund policy?+
- How do I install components after I buy?+
- Is there support if I get stuck?+
- Does it work with Vue, Svelte, or other frameworks?+
- Can I upgrade my plan later?+
- Can I transfer or change the license email?+
- Do you offer team licenses?+

Still on the fence? Send us a question.
